Flexi Glue

Ref. - FLEXIGLUE
EAN13 - 5600217588398
Units per Pack - 10

Features

Vicoustic's Flexi Glue is a complementary product designed to be applied in several materials. Its chemical composition is not aggressive to the environment. In fact, it has no solvents, and therefore is certified according to the most recent European legal regulations. Also it is perfectly fitted to any polyurethane or polystyrene Vicoustic solutions, assuring their correct and safe application to a room's surfaces.

The Flexi-Glue was designed in collaboration with the best professionals of the chemical industry. All the tests that were made also revealed excellent strength and versatility when applied to various materials.

Technical Information

- ✓ Each tube supports the installation of 10 to 15 panels depending on their weight
- ✓ The surface must be clean and dry to work perfectly

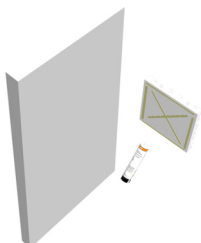

Applications

Acoustic Foam, EPS, Plywood, Wood Hall, Brick wall, etc
