Each Wall - 190/130/70 x 60 x 5 cm

Units per Box

9 Flexi Panel

3 Wood supports

Features

The Flexi Wall support is a portable acoustic treatment system. It's the ideal solution when your room is not. Its easy to set up mobile structure allows your room to be adjusted in few minutes to perform any type of audio projects in a highly effective way. The Flexi Wall is modular and easy to transport. This way, you can set up you own custom-made studio anywhere, anytime, with no need of special glues or any additional work. Still, it can also be used to change the acoustic conditions of a room in order for it to serve different purposes.

The Flexi Wall is highly absorbing in all range of frequencies. It was designed based on the Flexi panels with proved success on the market.

Technical Information
