

Ref. – PAINEL A75W

EAN13 - 5600217588145

Box - 62 x 62 x 62 cm

Weight - 5kg

Each Panel - 60 x 60 x 7,5 cm

Units per Box - 6

Features

The Flexi-Wood solution is a dedicated panel to the control of medium and medium-low frequencies, acting simultaneously as an absorber and a reflector. Thus, it creates ambiances not completely dry, but still controlling the exceeding energy across the room whilst ensuring living spaces with bright sound.

The entire Flexi Wood surface is structured in wood, exploring the potential of this material long known by its excellent acoustic properties. Additionally, the wood gives the panel a sobriety, modernity and elegance adequate to any type of spaces.

The panel was designed in 2 different thicknesses in order to be used in different frequency ranges. The Flexi Wood A75 performs as a Helmholtz resonator performing between 200Hz and 2000Hz.

Technical Information

Material: Acoustic Foam and Wood

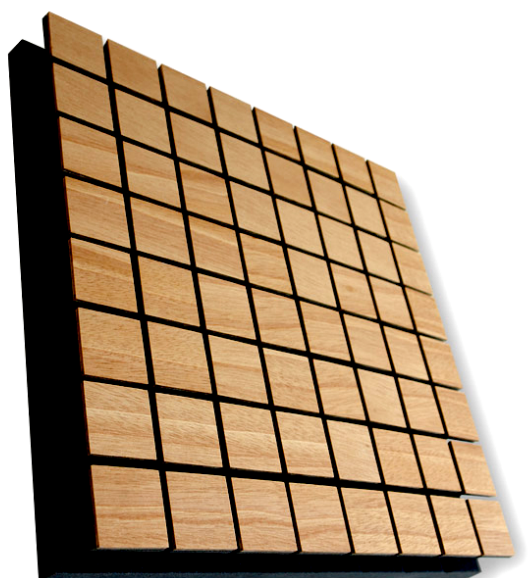

Fire Rating: M1

Color: Light Brown

Installation: Adhesive FlexiGlue

Applications

Recording and Broadcast Studios, Pos-Production Studios, Listening Rooms, Conference and Teleconference Rooms, Lecture Halls, Distance Learning Rooms, Cinema Room, Home Theaters, etc.
