

ISO Blanket ISO Blanket Pro

Ref. – ISOBLANKET/ISOBLANKETPRO

EAN13 – 5600217588206/190

Dimensions – 500 x 150 cm

Weight - 10kg / 12Kg

Features

The ISO Blanket and ISO Blanket Pro are limp-mass solutions to be applied for the treatment of airborne noise. They both differ from their STC (Sound Transmission Coefficient) since ISO Blanket Pro (picture from the right) due to its agglomerated fabrics has a bigger coefficient/performance.

They perform as sound blockers whether applied on ceilings, walls or floors. Their flexibility, low thickness and high resistance classify them as a very easy to use material. They perform at their best when applied in construction schemes using several layers of different materials,

Technical Information

ISO Under Floor STC: 27,7 Rw (dB)

ISO Under Floor Pro STC: 36,8 Rw (dB)

Applications

Home Theatres, Listening Rooms, Recording and Broadcast Studios, Pos-Production Studios, Lecture Halls, Distance Learning Rooms, etc.

Performance
