Features

The Round Bass 360 Bass Traps, sold in sets of four units per package, are considered to be one of the best optimized solutions for the treatment of low frequencies. They are also commonly used as an excellent complement to other acoustic products.

The unique shape of all the Bass Trap options presented by Vicoustic will allow you to minimize the dramatic effects that come from resonating waves, whose existence is commonly associated with confusion and the "Boom" sound that you often hear in an untreated room.

The Round Bass 360 uses a classic and simple cylindrical design. It can also be easily covered with fabric if desired – Premium Line.
