

Studio In A Box

Now in its 22nd year in 2006, RPG® has become one of the world's most respected acoustical pioneers. Its growing number of Studio In A Box™ products continue to give producers and engineers the opportunity to tune their tracking, mixing and listening environments with quality items at a reasonable cost.

The key issue in any recording studio is transferability: the ability of a mix to transfer to other listening environments outside the studio. For a mix to faithfully transfer to a wide range of acoustical environments, it must be created in a room with minimal acoustic distortion.

Listen To The Music...Not The Room

Spatial Tools: including the ProFoam™ Tiles, Skyline® and the Skyline® LP uniformly scatter sound and create a sense of immersion and envelopment in the soundfield.

Imaging Tools: the ProFoam™ Panels absorb reflections from the room's boundary surfaces which cause comb filtering.

Bass Management Tools: the ProFoam™ Corner Panels absorb lower frequency energy which can cause uneven bass response.

Room Packages: including the Studio In A Box™ Bronze, Silver, Gold and Platinum Packages offer state of the art pre-engineered room designs to address all of the forms of acoustical distortion in low cost packages. RPG's Studio In A Box™ Room Scaling Matrix helps users identify what they need for various room sizes making the buying process simple and straight forward.

RPG Studio-In-A-Box™ Bronze Package - SIBBP0

RPGs **Bronze** Studio In A Box is the ultimate entry level pre-engineered acoustic room correction package. the SIBBP0 accounts for all fundamental small room acoustic considerations at a very affordable price

Product Features:

- First reflection control
12 x 2'x2' or 6 x 4'x2' Profoam Panels with RPG's Patented VDAC nesting technology
- Bass Management with 2 x 4'x1'x9" Procorner
- Midband diffusion with 24 x 1'x1'x50mm Profoam Tile
- Easy installation! All panels can be mounted with 2 sided tape, velcro fastenings or any standard spray contact adhesive

Bronze SIAB Kit - SIBBP0

Kit contains:

- * 2 Procorner Panel
- * 24 1'x1'x50mm Profoam Tiles
- * Choice of 12 2'x2'x50mm or 6 4'x2'x50mm Profoam Panel

In any combination of Charcoal Grey or Purple UL94 HR1 firerated
Additional packs of materials are available(see below for application), these additions are:

- Profoam Tile 12 pack
- Profoam Panels 2'x2' 6 Pack 1 A (4'x2' Pack B optional)
- Profoam Panels 2'x2' 12 pack 2 A (4'x2' Pack B optional)

12 - 2'x2' or 6 - 4'x2' Panels

24 1'x1' Tiles

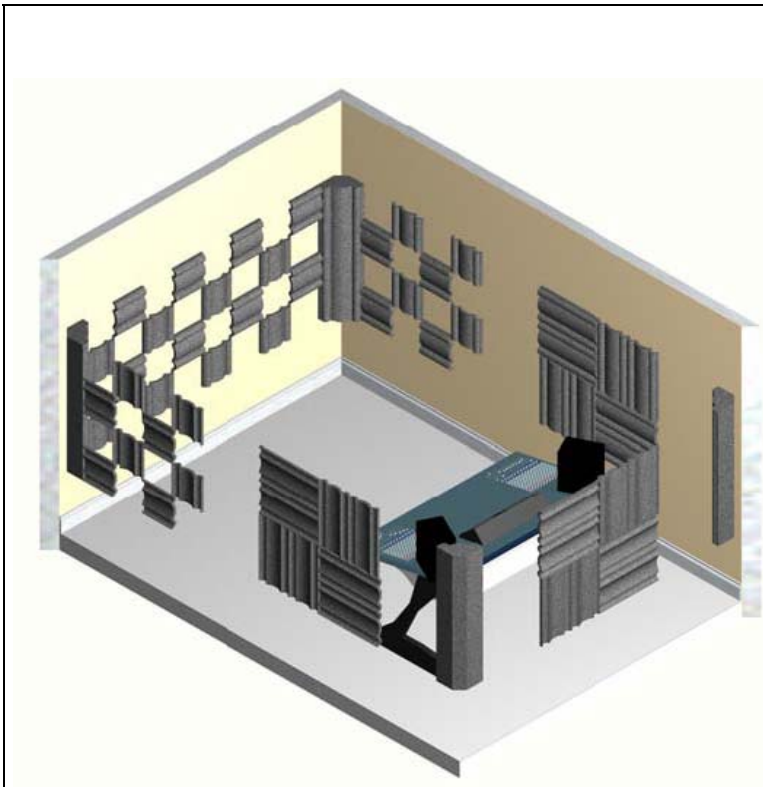

2 Procorner 4'

RPG Room Scaling Matrix

RPG's Bronze Studio SIBBP0 is modelled after a room that is 14' long x 10' wide x 8' high. The SIBBP0 can be scaled to properly fit any room size. The chart below will assist you in determining what additional materials you will need to adjust for your individual needs. See component literature for proof of performance data and additional features.
